Cloud at Work®

sage

Sage Hosting Delivered as a SaaS Experience.

Create happier clients and grow your hosting recurring revenue by partnering with Cloud at Work.

Sage hosted on Cloud at Work gives you the efficiency and financial benefits of SaaS, with the confidence that your client's business is running in a secure and stable environment.

Removes the red tape of typical SaaS deployments and allows you to maintain control of your client's environment
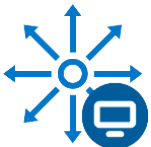

Your client's virtual private network is running in a world class collocated facility that exceeds industry standards of uptime, reliability, security and compliance

Our Sage experts speak your language and help guide you quickly to the source of a problem, so that you can deliver world class support for your clients

Move to the cloud on your client's terms. With Sage and Cloud at Work you get:

Flexibility
With Cloud at Work, integrate and connect Sage, ISVs and the additional applications you need to keep your business running at speed. While typically hosted in our Virtual Private Cloud, we can also accommodate requests to host applications in Azure infrastructure.

Scalability
Cloud at Work's infrastructure and tooling enables your clients to scale services based on their needs and growth. Beyond hosting Sage, our team can migrate and manage additional workloads, reducing your clients' dependence on their on-premises resources.

Security
Cloud at Work infrastructure utilizes an end-to-end approach for security, helping protect your client's data.

The Cloud at Work Experience

A Purpose-Built Sage Hosting Solution *Sage is in our DNA*
Specialists in hosting Sage applications, we have deep working knowledge of Sage solutions and understand the companies that rely on them — and that makes a difference. Our knowledgeable, highly responsive team of Sage-specific infrastructure experts are armed with extensive experience with Sage solutions and have unsurpassed cloud expertise.

Enterprise-level Cloud Technology *A SaaS Experience, Tailored for Each Client*
There is no "window within a window" using Cloud at Work. It looks, feels, and works in a SaaS fashion. Built to fit your client's needs, there are no limits on integrations or customizations, and with OnDemand Licensing your clients can upgrade their SQL, OS, and MS Office at any time – at no cost.

Peace of Mind *Industry-standard Uptime, Monitoring and Ongoing Support*
With Cloud at Work, we host your client's entire production environment in a stable and secure environment with 24x7x365 monitoring and support. With 99.99% availability and hourly backup snapshots along with the option of adding Disaster Recovery, you can rest assured that even in the event of a disaster, your clients' data will be safe, and their organization will be running smoothly.

Beyond Sage Application Hosting *A Flexible Platform to Improve Your Client's Workflow*
While Cloud at Work is focused on providing the best experience for hosted Sage applications, we also provide *DaaS at Work*, a virtual desktop solution, along with migrating and hosting of additional applications and workloads in Azure.

Virtual Private Cloud

Cloud at Work offers complete top of the line cloud services. Our **Virtual Private Cloud** is a 100% Virtual Private environment geared towards organizations who place extreme value on redundancy, security, and availability. The hosting service is delivered with a financially backed SLA and provides the most economical way to securely host your client's Sage software and beyond.
